Is it possible to create summary statistics for attributes like on [finder.geocommons.com/overlays/56182](http://finder.geocommons.com/overlays/56182) ?

Can the uploader manage the dataset, or only the admin?

Data CAPRA Maps **Contributed Maps** Help Hazard Reporting AME Hazard Data

## Contributed Maps

Contributed Maps are made by people like you. They are made from data hosted by the CAPRA GeoNode, as well as data hosted by other entities.

You can browse the contributed maps using the grid to the left.

Click on a map to select it. Then click **Open Map** to open it in a map editor, or click **Export Map** to export it as a widget.

Click here to [create your own map](#) !

The sidebar contains useful, but not urgent information. Check it out, if you like.

Too much Ext chrome... The header and buttons seem superfluous.

Is it possible to make this list not scroll?

The title alone is clearly not descriptive enough...  
Good place for a user column?

We should make this page more like the **Data Search Results** —with heading on the left, search field, quick searches for All and New, and means of refining.

We should include a strip for metadata between the toolbar and the header...

See next page.

# GeoNode Map Composer 2

The screenshot shows the GeoNode Map Composer 2 interface. At the top left is the GeoNode logo and navigation tabs for 'Maps' and 'Data'. The top right contains the user name 'scrollie' and links for 'Logout' and 'Help'. The main header area displays the map title 'Something about Nicaragua' and the creator 'Created by scrollie | More info'. Below the header is a toolbar with icons for map operations: a map icon, a print icon, a pan icon, a zoom in icon, a zoom out icon, a home icon, a refresh icon, and a globe icon. Three yellow sticky notes provide feedback: one on the toolbar suggesting better organization with a spacer, one on the 'More info' link suggesting a metadata strip and a link to the Map Info page, and one at the bottom right pointing to email notes about saving the map workflow.

GeoNode

Maps Data

scrollie | Logout | Help

Something about Nicaragua

Created by scrollie | More info

The toolbar should be better organized, with a spacer between map operations and zoom/view operations.

We should include a strip for metadata between the toolbar and header. "More info" should link to the map's Map Info page.
